Abdullah Al Noman

Undergraduate Researcher in Machine Learning & Deep Learning | B.Sc. in CSE, Comilla University

Cumilla, Bangladesh | abdullahcse.cou14@gmail.com | +8801307886773

LinkedIn | GitHub | Portfolio | Codeforces

Research Profile

Fourth-year Computer Science and Engineering student with hands-on experience building deep learning models and end-to-end MLOps pipelines. Seeking a research position where I can apply machine learning to biomedical problems, with a long-term focus on AI for drug discovery. Strong in algorithmic problem solving (competitive programming in C++), reproducible experimentation, and deploying models as working services.

Research Interests

- Artificial intelligence in drug discovery and biomedical engineering
- Deep learning: neural architectures, computer vision, natural language processing
- Reproducible machine learning and MLOps (experiment tracking, data versioning, model serving)

Education

B.Sc. in Computer Science and Engineering | Comilla University, Bangladesh

Currently in 4th year, 7th semester | CGPA: 3.56 / 4.00 |

- Relevant coursework: Algorithms, Data Structures, Artificial Intelligence, Machine Learning, Database Systems
- Thesis / research project: Blind Strike for Object Detection (supervisor: Dr. Md. Faisal Bin Abdul Aziz)

Higher Secondary Certificate (Science) | Govt. City College, Board of Intermediate and Secondary Education, CTG | 2021 | GPA 5.00 / 5.00

Secondary School Certificate (Science) | Khalam High School & College, Board of Intermediate and Secondary Education, Cumilla | 2018 | GPA 4.61 / 5.00

Research Experience and Publications

No publications or formal research positions yet. My research work so far is my undergraduate thesis project on object detection (see Education), supervised by Dr. Md. Faisal Bin Abdul Aziz, Associate Professor, Comilla University.

Selected Projects

End-to-End Deep Learning Suite | Python, TensorFlow, PyTorch, scikit-learn | Repository

- Built end-to-end artificial neural network pipelines for regression and classification, covering data preparation, training, model optimization, and deployment.
- Maintained a deep learning repository of experiments across architectures: DeepLearning Hub.

MLOps Ecosystem | BentoML, MLflow, DVC, Docker, GitHub Actions | BentoML, MLflow, DVC

- Implemented a machine learning operations workflow with model versioning, experiment tracking, reproducible data versioning, containerization, and microservice model serving.
- Applied CI/CD practices so that experiments and deployments can be repeated reliably.

CampusNexus | React, Tailwind CSS, Vercel | Live | Source

- Developed a responsive web platform for campus rental and student accommodation search.

Technical Skills

Machine learning and AI: PyTorch, TensorFlow, scikit-learn, OpenCV, Anaconda

MLOps and tools: Docker, Git, GitHub, GitHub Actions, DVC, MLflow, BentoML, Linux, Bash

Programming languages: Python, C++, C, JavaScript, TypeScript

Web: React, Next.js, Node.js, Express, Django, Tailwind CSS, HTML, CSS

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Competitive Programming

Active competitive programmer in C++ on Codeforces (profile). Practicing algorithms and data structures through contest problems.

Leadership, Societies and Activities

- **Research Society, Comilla University:** Member.
- **Comilla University IT Society:** Member.
- **Leo Club:** Member.

Honors, Certificates and Courses

- Perfect GPA 5.00 in Junior School Certificate (2015) and Higher Secondary Certificate (2021)
- Completed online courses on Udemy and Coursera

Languages

Bangla (native) | English
